

A long history of some 80 years of consistent dedication to quality and development is the vindication of three generations of successful family enterprise.

NORTHERN GREECE CERAMICS is the third generation in the family tradition in brick and roof tile manufacture which was established in 1935 by Stylianos Kothalis and continued by Stavros Kothalis, founder of the KOTHALIS Group.

The entrepreneur Stavros Kothalis was also the inspirator of KEBE.

The third generation of successful entrepreneurs consists of Despina Kothali, President and Managing Director, and Agis Kothalis, who is a member of the company's Board of Directors. The new management, while retaining the family's ethical values and ideas from the past, looks forward with optimism and confidence to the future of the new state-of-the-art production unit.

KEBE's human resources is recruited by qualified personnel, both in the scientific and the technical field, and thus lay firm foundations for a successful future.

The company's personnel are employed in a working environment which encourages initiative and promotes productivity. Their constant in-service training is achieved by a series of seminars and day-conferences which also have the purpose of briefing the company's clients and associates on up-to-date building technologies. The specialised themes are introduced by academic experts.

- NORTHERN GREECE CERAMICS holds the most important market share in Northern Greece, with representation and sales outlets throughout Greek territory.
- It is constantly expanding, with a fully organised Exports

 Department, in the international market, and has an important
 presence in Cyprus, the Balkans, Turkey, the Middle East, and

 North Africa.
- It always stays close to its clients, both by frequent visits to their premises and by taking part in business campaigns and exhibitions in Greece and abroad.

Human Resources

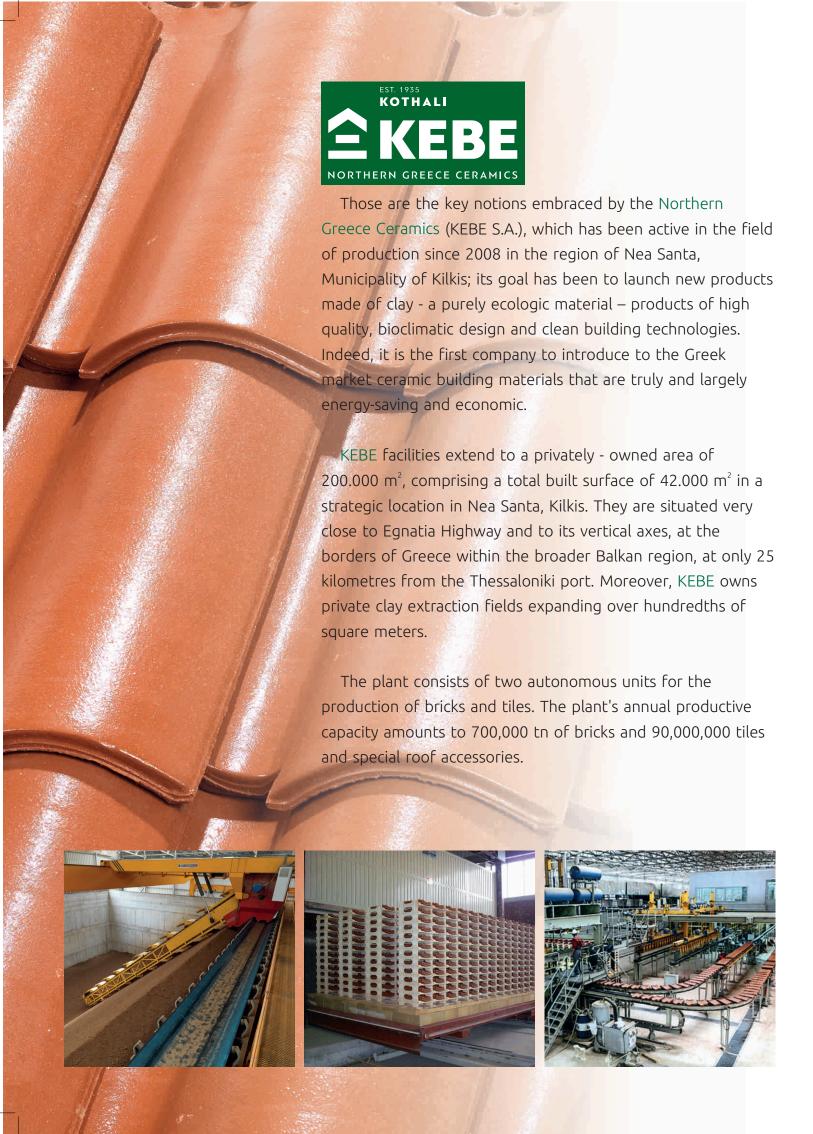

Energy Saving

The production process is fully automatic, comprising modern robotic technology applications which, in combination with one of the most accurate control systems, guarantee products of high quality, minimize energy consumption and greenhouse gas emissions; furthermore, it is worth noting that no liquid waste is produced.

Nevertheless, KEBE's strength rests in its people. By staffing its human resources with specialised personnel, both from the scientific and the technical field, the company lays a firm foundation for a successful course in an environment that favours initiative and promotes productivity.

For KEBE, technology is as important as the environment. Its respect to nature that provides the raw material, its scheduled participation in research programs and the search for alternative energy sources actually demonstrate the company's concern for an environmentally-conscious building and living.

However, KEBE's greatest challenge is to fulfill the client's expectations for fully harmonized solutions as set forth by bioclimatic design, while committing itself to even more innovative and effective solutions.

A «green» investment for the production of building materials made of clay, a purely ecological product with minimal energy consumption and zero waste.

Designed to give the impression of the traditional byzantine roof tile, while incorporating all safety and ease in placement features of the modern large roof tiles.

Faster installation and less supporting materials (only 10 pcs/m²), great permissiveness in the distance between shingles and cost effectiveness are the most important advantages.

Roof accessories ...

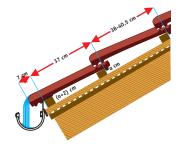

Dimensions	48 X 30 cm
Piece per m ²	10 pcs / m²
Water impermeability	>20 hours (EN 539-1)
Frost resistance	150 cycles (EN 539-2)
Weight / piece	4,50 Kgr.
Distance between shingles	38 - 40 cm

Roof Slant (Suggested prices)

EACH SIDE LENGTH (m)	SLANT (%)	SLANT (°)
0-5	35	19
5-6	40	22
6-7	45	25
7-8	50	27
8-9	55	29
9-10	60	31

HIP START

The MEDITERRANEAN and the MACEDONIAN roof tiles, can be nailed and interlock, thus offering the best possible installation solutions.

They both surpass the requirements set by the European Norms CE for water impermeability, shading, flexural strength, frost resistance and wind displacement.

With a full range of roof accessories, they offer the possibility for the construction of perfect clay tile roofs with maintenance free, unlimited service life.

Available in a continuously expanding color range, they empower the Architectural creativity in roof making to the highest standards.

Taking into account the availability of raw material, the landscape refill utility, the carbon print for the manufacture, transport and placement of roof tiles, the service life expectancy and the indoors energy savings from the clay tile roof, clay is a unique ecological building material.

MEDITERRANEAN GREY ROOF TILE

The most advanced roof tile design ever.

The harmonic wavy curve gives an impression of subtle sea wave that creates new prospects for roof Architectural masterpieces. Faster installation and less supporting materials (only 10 pcs/m²), great permissiveness in the distance between shingles and cost effectiveness are the most important advantages.

ANTIQUE

...new roof tiles range!

KEBE enriches its range of products with new antique style roof tiles, for all aesthetic needs and even more unique constructions.

Roof tiles that seem naturally aged, in full harmony with the natural environment.

And we keep going....

KEBE reintroduces the traditional Greek Bioclimatic Architecture using the most modern clay building products

Sustainability is about the responsible use of resources be they human, physical or financial, without depleting the possibility of future generations to provide for their own needs.

Bioclimatic Architecture refers to designing and constructing buildings using readily available building materials while taking advantage of all available renewable energy resources such as the sun, the wind etc.

KEBE certifies the high quality of its products and is committed to it

The company has been certified by **ELOT EN ISO 9001:2015** as regards the design, production and trade of its products, which are accompanied by **CE** Compliance
Certificate and **DoP**, by means of which our company certifies their properties and guarantees for them.

KIWA certifies that KEBE's roof tiles are in the highest level regarding frost resistance (Level 1- 150 cycles).

With a fully organised Exports Department, KEBE constantly expands in the international market. The company's export activities in combination with the excellent quality of its products have led to the international acknowledgment of KEBE and in the creation of a powerful "brand name". Currently, the company's products are being exported to the following countries:

Cyprus, Bulgaria, Romania, Slovakia, Moldova, Ukraine, FYROM, Albania, Turkey, Iran, Iraq, Azerbaijan, Georgia, Turkmenistan, Lebanon, Egypt, Libya, Algeria, Saudi Arabia, UAE, India and China.

The scientifically and technically qualified personnel of KEBE offers full client support by providing all information required on the products, as well as technical advice on their implementation.

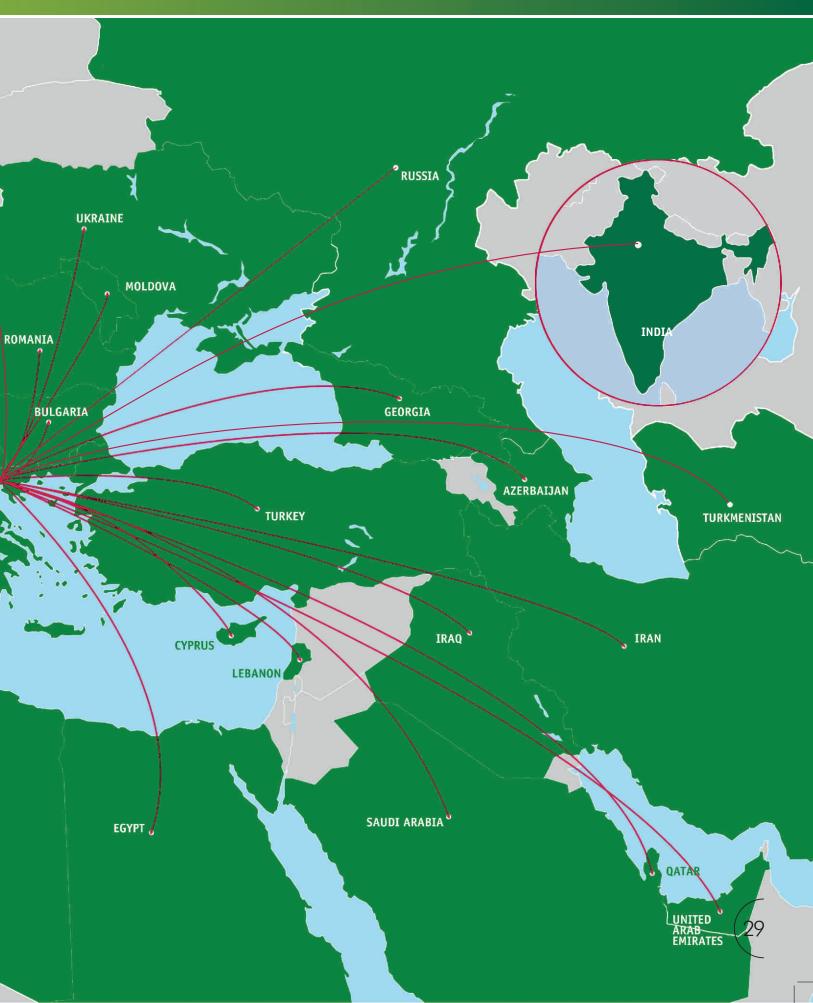

Our Exports Department is in close cooperation with the customers through frequent visits in their facilities, through continuous telephone communication and support as well as by participating in business missions and exhibitions abroad.

Throughout the year, an open invitation is extended to all our foreign customers to visit our premises and attend a presentation of our entire range of

innovative products in order to exchange their views and ideas with us.
